Plant List and Order Form 2026

Healthy plants for vibrant vegetables, fabulous flowers and happy herbs.

Orders will be available at the nursery the beginning of June and onwards. Please contact me by phone, email or regular mail to place your order (if you would like this order form electronically or in your PO Box, please contact me with your request).

Varieties marked with ~ are small singles: \$3.15 plus gst where applicable.
 Varieties marked with * are medium singles: \$5.15 plus gst where applicable.

Varieties that have no symbol are specialty items and will be priced at checkout. A 50% deposit is required on all orders, along with a non-refundable handling fee. Availability of plants is dependant on a number of factors beyond my control; this year's list may change without notice and appropriate substitutions or refund will be made, if required.

Ordering is not the only way to purchase plants!
The Plant Nursery, located at 103121 Alaska Highway,
will be open weekends in May and June. Opening day is Friday May 1, 2026!
Come out to the greenhouse to peruse the shelves!

Vegetables

	Quantity		Quantity
* Artichoke 'Imperial Star F1'		* Cucumber 'Lisboa F1'; parthenocarpic	
~ Arugula; nutty, spicy leaves		* Celery 'Tango'; excellent flavour	
~* Broccoli 'Aspabroc F1'; Broccolini-type, shoots		* Eggplant 'Patio Baby F1'; dwarf fruit and plant	
~* Broccoli 'Nutri-Bud'; large heads, many shoots		~ Fennel 'Antares Hybrid'; anise-flavoured bulbs	
~* Broccoli 'Sibsey Artwork F1'; early, multi-purpose		~ Green Onion 'Summer Isle'; perfect scallions!	
~* Broccoli 'Di Cicco'; medium heads, many shoots		~* Kale 'Red Russian'; my favourite kale!	
~* Broccoli 'Imperial F1'; large heads, late summer		~* Kale 'Nero di Toscana'; dinosaur kale	
~* Brussels Sprouts; 'Jade Cross F1'		~ Kohlrabi 'Kolibri F1'; purple skin	
~ Broad Bean 'Witkiem-Monica'; sturdy and productive		~ Kohlrabi 'Konan F1'; green skin	
~* Cabbage 'Early Jersey Wakefield'; pointed		* Leek 'Autumn Giant'; fall leek (sm clump of leeks)	
~* Cabbage 'Alcosa F1'; savoyed		~ Lettuce 'Red Salad Bowl'; red oakleaf	
~* Cabbage 'Primero F1'; red		~ Lettuce 'Royal Oakleaf'; green oakleaf	
~* Cauliflower 'Snow Crown F1'; white		~ Lettuce 'Parris Island Cos'; romaine	
~* Cauliflower 'Amazing' (O/P); white		~ Lettuce 'Buttercrunch'; buttercrunch	
~* Cauliflower 'Fioretto F1'; sprouting, shoots		* Melon 'Minnesota Midget'; early cantaloupe	
~* Celeriac 'Mars'; great storage veg		~ New Zealand Spinach; loves heat!	
* Cucumber 'Salad Bush F1'; container, parthenocarpic		* Onion 'Norstar F1'; yellow cooking (sm clump of onions)	
* Cucumber 'Corentine'; pickling, parthenocarpic		* Onion 'Red Tropeana Lunga'; pungent, oblong shape	
* Cucumber 'Sweet Success F1'; parthenocarpic		* Pole Bean 'Blue Lake'; tall productive vines	

~ Pea 'Super Sugar Snap'; snap pea, edible pod		Tomato 'Improved Polish Paste'; paste, vining	
~ Pea 'Grundy-Perfect Arrow'; shelling pea		Tomato 'Gardener's Delight'; cherry, vining	
* Pepper 'Snackabelle Red'; mini sweet bell pepper		Tomato 'Yellow Pear'; cherry, vining	
* Pepper 'Apple Sweet Pimento'; small and sweet		Tomato 'Manitoba'; early salad; bush	
* Pepper 'Early Jalapeno'; classic hot pepper		Tomato 'Silvery Fir'; early salad; bush	
~ Salad Green – Mizuna		Tomato 'Heinz 1439'; mid-season, bush, canning	
~ Salad Green – Tatsoi		* Tomatillo 'Super Verde F1'; for salsa verde!	
~ Salad Green – Red Giant Mustard		* Watermelon 'Jade Duchess F1'; early and productive	
* Summer Squash 'Yellow Pattypan'		* Winter Squash 'Sunshine F1'; Kabocha-type	
~ Swiss Chard 'Bright Lights'; multi-coloured stems		* Winter Squash 'Early Butternut F1'; butternut	
~ Swiss Chard 'Lucullus'; green stems		* Winter Squash 'Pinnacle F1'; spaghetti	
Tomato 'Tiny Tim'; red cherry; mini bush		* Zucchini 'Black Beauty'; classic green zuke	
Tomato 'Geranium Kiss'; red cherry; mini bush		* Zucchini 'Eight Ball F1'; round	
Tomato 'Oregon Spring'; early salad, bush			
Tomato 'Tumbler F1'; for hanging baskets; bush

Herbs

	Quantity		Quantity
* Anise Hyssop (Agastache foeniculum); licorice-scented leaves and spiky purple flowers; great bee plant		* Indian Lemongrass; will over-winter inside	
* Basil 'Sweet'; great container basil, pop a few in with the tomatoes - the plants complement each other		* Lemon Balm (Melissa officinalis); fresh lemony flavour, great in tea	
* Basil 'Cinnamonette'; distinctive cinnamon taste and odour, an ornamental edible!		* Lemon Bergamot; lavender-pink flowers attract beneficial insects	
~ Bronze Fennel; lacy, red-tinged foliage		* Oregano 'Greek'; strong spicy flavour, dries well	
~ Borage; clear blue, edible star flowers and blue-grey foliage, self-seeds and great for bees		* Parsley 'Dark Green Italian'; large flat leaves, great parsley flavour	

~ Chervil; a delicate anise-flavoured herb, add just before serving; also a superb companion plant, providing a source of nectar and habitat for beneficial insects, pollinators and bees		* Parsley 'Forest Green'; curly, crinkled leaves with classic flavour	
~ Chamomile, German; the classic tea herb, keep flowers picked to encourage more blooms		* Sage (Salvia officinalis); grey-green foliage and an essential flavour for poultry	
* Catnip; a medicinal herb used to aid sleep and, of course, a well-known kitty treat!		* Spearmint; this sweet mint is lovely in tea, summer salads, mojitos and more!	
Chives; perennial garden favorite, plant a clump in the cold frame for extra-early chives		~ Summer Savoury; the classic herb for beans, summer savory's pleasant flavour lends itself well to any dish - the purplish-pink flowers in the summer are a bonus!	
~ Cilantro; nothing beats your own fresh cilantro; also a superb companion plant, providing a source of nectar and habitat for beneficial insects, pollinators and bees		~ Sweet Annie (Artemisia annua); sweetly fragrant foliage with finely cut leaves, great for potpourri (not edible)	
~ Dill; a superb companion plant, providing a source of nectar and habitat for beneficial insects, pollinators and bees as well as many fronds of fresh dill!		* Sweet Marjoram; a strong spicy flavour gives this herb in the Oregano family a bit of a kick, great for stew, wild meat and sausage	
~ French Sorrel 'Green de Belleville'; strong lemony flavour on this tender perennial		* Thyme; lovely flavour and vigorous growth, great to dry for the winter	
~ Garlic Chives; garlicky flat leaves pack a flavour punch

Open-pollinated and Hybrid Explained

I grow a mix of open-pollinated and hybrid varieties. Open-pollinated seeds are produced by crossing two parent plants of the same variety (in the same species) to produce offspring (seeds) just like the parent plants.

Open-pollinated varieties have generally been grown for many years. Hybrid seeds are produced by crossing two parent plants of different varieties within the same species. The resulting offspring (seeds) will have characteristics from both parents.

It is important to note the difference between hybrid and genetically engineered: hybrid seeds are crosses between the same species and genetically engineered seeds are the result of manipulating DNA between different species.

I grow open-pollinated varieties to save seed from them and to enjoy their unique characteristics. I grow hybrid varieties for plants that take longer to mature or flower as hybrid varieties usually have a shorter time to maturity than open-pollinated varieties.

While hybrids are useful, they can also be expensive, propagation-proprietary and owned by multi-national corporations.

Seed saving is an important link in the sustainability chain and a must if we don't want to lose the diversity in our seed lines.

If you would like more information on saving your own seeds, please do not hesitate to contact me with your questions.

Attracting and Keeping Beneficial Insects, Pollinators and Bees

Growing plants that provide habitat and food for beneficial insects, pollinators and bees is the best way to attract and keep them in your garden or greenhouse. Diversity is an important part of a healthy garden and mixed plantings of flowers, herbs, annuals and perennials allows diversity to flourish.

Beneficial insects and pollinators need more than blooming plants to thrive. They need a shallow dish of water with gravel in it to provide a place to land and sip (I have a small tray of mud that I keep moist for the same purpose) as well as undisturbed plantings or wild habitat to lay eggs and allow the larvae to develop into adults. Once the larvae are adults, they will need plants rich in nectar to continue their life cycle. Throughout their life cycle, these good bugs are eating the not so good bugs that harm the crops we want to eat or enjoy.

The Yukon is fortunate to have a number of species of solitary bees and bumble bees that live here. These bees do not live in hives or produce honey as we know it. These bees are the first bees out in the spring and they are responsible for pollinating the wild fruits that we enjoy as well as many of our garden crops. It is so important to support our population of wild bees as wild bee species are disappearing at a rapid rate all over the planet. Without wild bees, the yields of our forest fruits, domestic fruit trees, domestic fruits and crops is drastically reduced. Providing undisturbed habitat, such as perennial plant beds or a windbreak/border of wild plants allows queen bumble bees to overwinter in protected areas. The queen bumble bees then emerge in the spring and find natural chambers in the ground to build their nest, lay eggs and nurture their larvae. Solitary bees use hollow stems, cracks and channels in old wood to lay their eggs, with a ball of pollen and nectar, then seal the cell up with mud and create a new cell in the line. These eggs overwinter and in the spring emerge as solitary bees to start the cycle again. Solitary bee houses can be purchased or made to provide a place for the bees to lay their eggs. Providing plants rich in pollen and nectar provides food for adult wild bees to nurture their young and ensure the next generation of wild bees.

Plants for Beneficial Insects, Pollinators and Bees

Alyssum, Anise Hyssop, Arugula Flowers, Asclepias, Basil, Borage, Brassica Flowers, Cilantro, Chervil, Dill, Bergamot, Chamomile, Chives, Fennel, Parsley, Sage, Thyme, Cosmos, Lovage, Lobelia, Marigold, Mignonette, Phacelia, Bachelor's Buttons, Nigella, Verbena, Calendula, Evening Scented Stocks, Sweet Marjoram, Summer Savoury, Yarrow, Poppy, Clover
